

Alarm.com Smart Water Valve+Meter

The Smart Water Valve+Meter, part of the Alarm.com Water Management solution, combines cutting-edge technology with best-in-class hardware that serves as the ultimate safeguard from costly leak repairs and high water bills.

LEAK DETECTION AND SAVINGS

Whether it's a burst pipe, slow drip, or leaky appliance, our smarter Water Management solution is your guard against costly water damage and excessive water use.

Flood Damage Protection

Automatically shuts off the main water supply, preventing burst pipes or major leaks from flooding your home.

Early Detection

Detect small problems before they escalate, such as health risks from mold or frozen pipes from low water temps.

Reduce Costs

Proactively monitors and manages water consumption to help you use water more efficiently and control costs.

INTELLIGENT WATER MANAGEMENT

Deep integration with the Alarm.com ecosystem helps our smart valve and meter form smarter responses whether you're at home or away.

Entire Home Coverage

Set up rules to automatically shut off your water main supply when a leak is detected by our Water Management solution, an integral part of Whole Home Protection.

Proactive Reporting

Get mobile app alerts as soon as issues are detected and monitor changes in water usage over time to maximize efficiency.
